ABOUT THE SEMINAR

The purpose of this seminar is to point out the need of face-to-face interactions which is significantly hampered due to extensive use of social media as mode of interpersonal communication. On top of that, youth tend to use abbreviations of words during message typing. This practice will render them forget actual spelling of words and they will face problem while writing any formal letter or in any exam. So this seminar will encourage students to practice using correct spelling and to frequently meet with friends rather than chatting via social media platforms.

About The Programme

In the present time education system is conjugated with the career but personality and proper environment are benevolent for the overall development of a person. Depending on the individual's personality, career counselling is needed to select a proper environment to work in. Different students from different institutions choose the wrong path due to a lack of proper counselling and not being able to come to the right decision about what to do after graduation. For this reason, realizing the need for career counselling to guide the present generation, our institution has thought of a career counselling programme from which, it is expected, many students may be benefitted.
